

# SINGAM NARESH

Bengaluru, India | [naresh.singam.m@gmail.com](mailto:naresh.singam.m@gmail.com) | +91 9398475727 | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

---

Entry-level Software Engineer with hands-on experience designing, deploying, and maintaining scalable full-stack applications using Java, Spring Boot, React, and MERN technologies. Experienced in building RESTful APIs, implementing authentication and authorization, improving backend performance by up to 30%, and deploying applications to cloud platforms. Strong foundation in Data Structures, OOP, and DBMS, with exposure to modular service design, unit-level testing, and production-ready workflows in agile, cross-functional environments.

## TECHNICAL SKILLS

---

**Programming Languages:** Java, JavaScript, Python

**Backend:** Spring Boot, Node.js, RESTful APIs, JWT Authentication

**Frontend:** React.js, HTML5, CSS3

**Databases:** MySQL, MongoDB

**Tools & Platforms:** Git, GitHub, Postman, VS Code, Vercel, Render

**Core Concepts:** Object-Oriented Programming, Data Structures, DBMS, API Design, Modular Architecture, Unit Testing, Deployment Fundamentals

## EXPERIENCE

---

### Software Engineering Intern

Bengaluru, India

*Laverse Digital*

- Developed and maintained reusable React components integrated with RESTful APIs, reducing UI defects by 25%.
- Optimized frontend rendering and API consumption logic, improving dashboard load time by 20%.
- Debugged and resolved high-priority UI and functional issues using structured root-cause analysis.
- Collaborated with frontend, backend, and UI/UX teams to deliver responsive, cross-browser compatible features.
- Took ownership of assigned UI modules, independently proposing fixes and validating changes before release.

## PROJECTS

---

### JobNext.in – Full Stack Job Portal

[GitHub](#)

*Java, Spring Boot, REST APIs, MySQL*

- Designed and developed a role-based job portal enabling secure job posting and application workflows.
- Built and optimized RESTful APIs across multiple modules, reducing average response time by 30%.
- Designed a normalized relational database schema enforcing referential integrity and data consistency.
- Applied modular service-layer design aligned with microservices principles to support maintainability.
- Wrote unit-level tests for service and controller layers to validate business logic, API responses, and error handling.
- Deployed frontend services to Vercel and backend services to Render, configuring environment variables and managing stable cloud-based deployments.

### MERN Stack Task Manager Application

[GitHub](#)

*React, Node.js, MongoDB, JWT*

- Built a secure task management system with JWT-based authentication and full CRUD functionality.
- Refactored API routes and middleware to reduce server response latency by 30%.
- Designed a responsive UI and validated workflows through real-user testing scenarios.

## EDUCATION

---

### B.Tech – Electronics and Communication Engineering

2020 – 2024

Sri Venkatesa Perumal College of Engineering and Technology

CGPA: 6.89/10

## CERTIFICATIONS

---

- Full Stack / MERN Stack Developer – Simplilearn
- Java Programming – Great Learning
- MySQL Database – Simplilearn
- AWS APAC Solutions Architecture Virtual Experience – Forage
